ISO 27001

Information security management system certification

This century is often associated with the information revolution. Success can be determined by an organisation's ability to use and protect its information – one of its most valuable assets.

ISO 27001 offers a system for managing Information Security and is fully compatible with other existing management systems. ISO 27001 is applicable to all organisations and certification is beneficial to most. URS has this scheme accerdited by UKAS accreditation body.

Benefits of ISO 27001 certification:

- makes information flow within a company secure and effective
- ensures information is available on time
- prevents loss, abuse and unauthorised modification of information
- ensures information is only accessible to authorised persons
- assists compliance with legal requirements and data protection
- is an excellent training tool for employees and staff.

Why choose URS?

URS is accredited by the internationally recognised United Kingdom Accreditation Service (UKAS).

The extensive range and high quality of the services provided by URS has attracted more than 40,000 contracts across 32 countries.

Certified organisations can include URS and UKAS logos in their promotional activities.

URS is well respected within the IT security sector which is demonstrated by the likes of Dell Computing and Siemens selecting URS as their preferred registrar of choice.

URS' auditors pride themselves in the competence criteria they have to demonstrate to become a practising and pragmatic 27001 auditor.
